

ARCH DRACULA - THE RETURN OF THE DOTFILES (THE AWESOME EDITION)

ArchDracula By:

- Jeremie Cote
- @jeremie1001

Based on terminal color theme Dracula and inspired by <https://github.com/manilarome/the-glorious-dotfiles>. Icons modified from flaticons repository

Disclaimer, some of the aspects of this rice are not completely functional at this time as this is still a work in progress so please be patient. Components still being worked on can be found in the TODO.txt file.

This is a more specific repo focused on just the AwesomeWM config portion of my rice. Full git bare repo can be found [here](#). Some relevant configs can be found there such as picom, gtk, firefox, sddm and rofi themes.

Spoilers

Quick stats

- **OS:** Btw... Arch
- **WM:** AwesomeWM (duh)
 - More specifically, it uses awesome-git since it includes some features not included in mainline awesome such as the colored and rounded progress bars in the control center
